Nunes Statement on Access to FBI Electronic Communication

Washington, April 11, 2018

House Permanent Select Committee on Intelligence Chairman Devin Nunes issued the following statement today:

"After numerous unfulfilled requests for an Electronic Communication (EC) related to the opening of the FBI's Russia counterintelligence probe, Chairman Trey Gowdy and I met this afternoon with Deputy Attorney General Rod Rosenstein. During the meeting, we were finally given access to a version of the EC that contained the information necessary to advance the Committee's ongoing investigation of the Department of Justice and FBI. Although the subpoenas issued by this Committee in August 2017 remain in effect, I'd like to thank Deputy Attorney General Rosenstein for his cooperation today."
