**Dominion, Smartmatic, Sequoia And Venezuela**

**TOPLINES**

Dominion And Smartmatic Are Independent Companies That Split From Each Other In 2012.
- Both Dominion and Smartmatic are companies that provide election systems consulting.
- Dominion entered into a partnership with Smartmatic in 2009.
  - Dominion provided Smartmatic with voter machines used in the 2010 and 2013 Philippine elections.
  - There were highly publicized glitches in the machines that caused reputational harm on Dominion.
- Dominion and Smartmatic terminated their partnership in 2012 after Smartmatic began doing business in Puerto Rico which Dominion interpreted as a violation of a noncompetition agreement in the United States.
  - There is no evidence Dominion used Smartmatic technology in their machines in the 2020 election.

There Is No Apparent Relationship Between Smartmatic And The Spanish Company Indra.
- Smartmatic claims that is has no relationship with Indra.
- Smartmatic and Indra are rivals in the Philippines.
- There is no evidence that votes were being counted overseas in Spain.
  - The co-founder and CEO of Smartmatic is a Spanish-Venezuelan Citizen who now lives in London.
  - Smartmatic is headquartered in London.

Dominion Has Not Direct Ties To Venezuela.
- While Dominion has no company ties to Venezuela, Smartmatic does through its owners.
- Smartmatic was investigated by the Committee on Foreign Investment in the United States due to its ties to Venezuela.
- In 2004, Smartmatic was chosen by Venezuelan authorities to be used in a contentious referendum that confirmed Chavez as President.
  - This election is believed to have been tampered with, as the algorithm appeared to adjust the vote in Chavez favor.
- Before this election, the Venezuelan government invested in a smaller company tied to Smartmatic through its owners.
  - In return for the investment, the Venezuelan government agency was given a 28 percent stake and a seat on its board.
  - The Venezuelan government placed a senior official of the Science Ministry and advisor to Chavez on elections technology, Omar Montilla, on the board.
• Venezuelan officials insist the money invested was repaid, and that Venezuela never directly had a stake in Smartmatic.

**Sequoia Was Owned By Smartmatic From 2005 to 2007 And Not Purchased By Dominion Until 2010**

• Smartmatic owned Sequoia voting machines from 2005 to 2007
• While Smartmatic owned Sequoia, Sequoia machines caused irregularities in Chicago
• Dominion bought Sequoia in 2010, three years after Smartmatic sold the company

**There Is No Evidence That Dominion's CEO Or Any Other Leader Of The Group Has Ties To Antifa**

• There is no evidence that Dominion CEO John Poulos has ties to Antifa
• There is an internet rumor that Dominion's Director Of Product Safety, Dr. Eric Coomer, had ties to Antifa
  - Coomer allegedly posted (now deleted) some songs to his Facebook Page that were anti-police.
  - Coomer also wrote a Facebook post (now deleted) in which he criticized President Trump for characterizing Antifa as an organization.
  - There is no evidence Coomer is a member or has any ties to Antifa

In 2009, Dominion Entered Into A Contract Providing Optical Scanners To Smartmatic

In 2009, Dominion Entered Into A Contract With Smartmatic In Which They Provided Smartmatic Optical Scanners To Be Used In The 2010 Philippine Election. "Dominion entered into a 2009 contract with Smartmatic and provided Smartmatic with the PCOS machines (optical scanners) that were used in the 2010 Philippine election, the biggest automated election run by a private company. The automation of that first election in the Philippines was hailed by the international community and by the critics of the automation. The results transmission reached 90% of votes four hours after polls closed and Filipinos knew for the first time who would be their new president on Election Day. In keeping with local Election law requirements, Smartmatic and Dominion were required to provide the source code of the voting machines prior to elections so that it could be independently verified." Smartmatic's Reputation Suffered After Glitches In The Philippine Elections

Dominion And Smartmatic’s Reputations Suffered After A Series Of High Profile Glitches In The 2010 And 2013 Philippine Elections. "Both companies’ reputations suffered as a result of heavily publicized litigation relating to a software glitch that was resolved just before the 2010 election and that litigation rumbled on to partly affect the mid-term elections in 2013. However, for the 2016 elections in the Philippines, Smartmatic operated with their own technology having released a new vote counting machine which replaced the previous version, resulting in 'the speediest canvassing proceedings in the country's history.' Litigation Over Smartmatic "Glitches" Has Alleged An Impact On The 2010 And 2013 Mid-Term Elections In The Philippines. "Litigation over Smartmatic 'glitches' alleges they impacted the 2010 and 2013 mid-term elections in the Philippines, raising questions of cheating and fraud. An independent review of the source codes used in the machines found multiple problems, which concluded, 'The software inventory provided by Smartmatic is inadequate, ... which brings into question the software credibility,' ABS-CBN reported." **Domion And Smartmatic Terminated Their Contract In 2012 Over A Disagreement Regarding A Noncompetition Agreement In Puerto Rico**

In 2012, Dominion Accused Smartmatic Of Breaching A Noncompetition Clause By Conducting Business In Puerto Rico - Smartmatic Claimed That Puerto Rico Was Not Part Of The United States And Therefore Was Not In Violation Of An Agreement Not To Compete In The United States. In 2012, Smartmatic submitted a bid to sell the licensed voting systems to the government of Puerto Rico for its upcoming elections. Dominion also submitted a bid. Upon learning of Smartmatic's bid, Dominion notified Smartmatic by letter that Smartmatic was in breach of the license agreement's noncompetition provision, asserting that Puerto Rico is 'in the United States.' Dominion also purported to terminate the agreement as a result of the alleged breach. Smartmatic rejected Dominion's termination as invalid, contending that Puerto Rico is not 'in the United States.' Following its purported termination of the license agreement, Dominion ceased performing its contractual obligations, leading Smartmatic to file suit in the Court of Chancery. In response, Dominion asserted counterclaims. (Smartmatic Int'l Corp. v. Dominion Voting Sys. Int'l Corp. CA. No. 7844-CP (Del. Ch. May 1, 2012) (Parsons, V.C.).)

**There Is No Evidence That Dominion Used Smartmatic's Software In The 2020 Election Cycle**

The Partnership Between Dominion And Smartmatic Ended In 2012 “On Rocky Terms.” “As previously mentioned, Smartmatic and Dominion Voting have shared tumultuous interactions. Their 2009 partnership ended on rocky terms. The termination of their agreement in 2012 had the potential to deny Smartmatic access to vital material and information necessary to correct any issues with the PCOS voting devices, which created an understandable fear among the Filipino public since Smartmatic had been contracted to provide the PCOS systems for the May 2013 mid-term elections. However, for the mid-term 2013 elections, Smartmatic deployed 76,000 machines and only 258 of those had to be replaced, and in many cases, it was due to handling errors rather than machine failures.” (Voting Technology Companies in the U.S. - Their Histories and Present Contributions) (https://www.accesswire.com/471912/Voting-Technology-Companies-in-the-US-Their-Histories-and-Present-Contributions) 8/10/17)

Smartmatic And Indra Do Not Appear To Have Ties

**Smartmatic And Indra Are Rivals**

Smartmatic And Indra Were Considered Rival Companies In The Philippines. “It looks like the war between two technology providers vying for a P2.5-billion contract at the Commission on Elections (Comelec) for the 2016 presidential polls has begun. Smartmatic-TIM Corp., which provided the technology during the last two elections in the country, has questioned the eligibility of rival Indra Sistemas S.A. to participate in the public bidding for the lease of 23,000 optical mark reader (OMR) machines for the forthcoming balloting. In a statement, Smartmatic-TIM lead counsel Ruby Yusi said the approval of Indra’s eligibility in the first stage of the bidding process was questionable since the Spanish company failed to properly designate a local representative for the bidding.” (The War Between 2 Tech Firms For...
Rudy Giuliani Claimed That Smartmatic Sent Its Votes Overseas To Barcelona To Be Counted

**In 2006, The Committee On Foreign Investment In The United States Opened An Investigation Into Smartmatic.** “The federal government is investigating the takeover last year of a leading American manufacturer of electronic voting systems by a small software company that has been linked to the leftist Venezuelan government of President Hugo Chávez. The inquiry is focusing on the Venezuelan owners of the software company, the Smartmatic Corporation, and is trying to determine whether the government in Caracas has any control or influence over the firm’s operations, government officials and others familiar with the investigation said. The inquiry on the eve of the midterm elections is being conducted by the Committee on Foreign Investment in the United States, or Cfius, the same panel of 12 government agencies that reviewed the abortive attempt by a company in Dubai to take over operations at six American ports earlier this year.” (Tim Golden, “U.S. Investigates Voting Machines’ Venezuela Ties.” [ HYPERLINK "https://www.nytimes.com/2006/10/29/washington/29ballot.html" ] 10/29/06)

- **This Election Involved “A Very Subtle Algorithm” That Appeared To Adjust The Vote In Chávez’s Favor.** “Turning to Venezuela, he said that Chavez controlled all of the country’s voting equipment before he won a 2004 nationwide recall vote that had threatened to end his rule. When Chavez won, Venezuelan mathematicians challenged results that showed him to be consistently strong in parts of the country where he had weak support. SMARTMATIC OWNED SEQUOIA BETWEEN 2005 AND 2007

In 2005, Smartmatic Bought Sequoia Voting Systems

While Smartmatic Owned Sequoia, Sequoia Voting Machines Caused Irregularities In Chicago

In March 2006, a series of delays and irregularities in Chicago were blamed on Sequoia Voting Machines, traceable to Smartmatic workers and software issues from Venezuela. "But after a municipal primary election in Chicago in March, Sequoia voting machines were blamed for a series of delays and irregularities. Smartmatic's new president, Jack A. Blaine, acknowledged in a public hearing that Smartmatic workers had been flown up from Venezuela to help with the vote. Some problems with the election were later blamed on a software component, which transmits the voting results to a central computer, that was developed in Venezuela." In 2007, Smartmatic Sold Sequoia Voting Machines

In 2007, Smartmatic was forced to sell Sequoia Voting Systems. "On December 22, 2006, Smartmatic Corporation announced the company's intention to sell Sequoia Voting Systems. At that time, Smartmatic CEO Antonio Mugica stated, 'Sequoia's customer base has grown substantially and its revenues have increased four-fold. However, given the current climate of the United States marketplace with so much public debate over foreign ownership of firms in an area that is viewed as critical U.S. infrastructure - election technology - we feel it is in both companies' best interests to move forward as separate entities with separate ownership. As part of this process, we plan to sell our Sequoia Voting Systems ownership.' Sequoia Voting Systems worked for many months with Smartmatic to find an appropriate situation that would be a win-win for both companies. Given Sequoia's strong position in the US electoral market and significant opportunities therein, many buyers expressed interest in Sequoia. Smartmatic selected this team to purchase Sequoia as they believe in the ability of Sequoia's current management team to perform as successfully as they have in the past, which will allow Smartmatic to capitalize on the earn-out purchase plan." - Jack Blaine and Peter McManemy Led The Purchase Of Sequoia From Smartmatic, Making The Company U.S. Owned. "The investment group, led by Sequoia President & CEO Jack Blaine and company Chief Financial Officer Peter McManemy, purchased Sequoia from former parent company Smartmatic Corporation for an undisclosed sum. As with most transactions involving two private entities, the specific terms of the sale are not being disclosed. However, this transaction does include investment by the management team, a small loan and an earn-out. This scenario provides an excellent financial structure for Sequoia to leverage and completely eliminates Smartmatic's ownership, control and operational rights of any kind in Sequoia." Sequoia Was Acquired By Dominion In 2020

In 2010, Sequoia Was Acquired By Dominion Voting Systems. "After losing money for several years, on March 8, 2005, Sequoia was acquired by Smartmatic, a multi-national technology company which had developed advanced election systems, voting machines included. In November 2007, following a verdict by the CFius, Smartmatic was ordered to sell Sequoia, which it did to its Sequoia managers having U.S. citizenship. Sequoia Voting Systems was acquired by Denver-based Dominion Voting Systems on June 4, 2010." PUBLIC STATEMENT FROM "ANTIFA" IN RESPONSE TO THE THREATS ISSUED BY UNITED STATES PRESIDENT DONALD J. TRUMP

Dear Mr. Trump:

Let us be perfectly clear:

"Antifa" isn't an organization. There's no membership, no meetings, no dues, no rules, no leaders, no structure. It is, literally, an idea and nothing more. Even the claim of this author to represent "Antifa" is one made unilaterally for the purposes of this communication and nothing more; there is no governing body nor trademark owner to dispute the author's right to represent "AntiFa."

"Antifa" is a neologism constructed from a contraction of the phrase "anti-fascist." The truth is, there's no such thing as being "anti-Fascist." Either you are a decent human being with a conscience, or you are a fascist.

The ostensible president of the United States has, today, openly declared that he is a fascist, and that he intends to turn the military power of the United States into a fascist tool.

Now there is no question, and we can stop pretending that this man represents anything but the worst in humanity, which his supporters embody.

And that is the only effect his words will have.

It will likely be no problem for LEO to identify the author of this document, who also has maintained the "Antifa" page on Facebook since founding it in 2017.

The author of this document is unconcerned with that inevitability because neither that author, nor this document, has been involved in a crime of any sort in any way.

But, since both the "president" and the media insist on acting as though "AntiFa" is this big, scary organization, the author supposes it's time for "AntiFa" to make a statement.

Thus:

"Antifa supports and defends the right of all people to live free from
