And do you have a general sense of when you left Greenberg, approximately?</li> <li>A Yes, it was, I believe, it was in 1988.</li> <li>Q And where did you go next?</li> <li>A I moved to Los Angeles to work at Kenneth Leventhal &amp; Company.</li> <li>Q And what was Kenneth Leventhal &amp; Company?</li> <li>A At the time part of the Big Ten accounting firms in the country. Kenneth Leventhal was very different, it provided accounting, tax and consulting services specifically for the real estate industry.</li> <li>Q All right. I think your testimony was that while you were at Greenberg you had been a partner. Why did you choose to leave your partnership and go to Kenneth Leventhal?</li> <li>A For me, I wanted to expand my use and application of real estate appraisals tools that I had. So while I had the real estate appraisal tools, I always believed they could be used in different capacities.</li> </ul>	<ul> <li>appraisals.</li> <li>Q Did you have some exposure to financial statements</li> <li>while at Kenneth Leventhal?</li> <li>A Yes.</li> <li>Q And to what extent?</li> <li>A The firm often did Statements of Financial Condition</li> <li>for various of its clients. I was usually asked by an</li> <li>accounting partner to meet with the client, talk about their</li> <li>real estate holdings and talk about what they might be doing</li> <li>with their real estate and then provide feedback to the</li> <li>accounting people who would then use that however they might in</li> <li>their accounting reports.</li> <li>Q At some point did Kenneth Leventhal merge with another</li> <li>entity?</li> <li>A Yes, they did.</li> <li>Q What entity was that?</li> <li>A That was Ernst &amp; Young.</li> <li>Q In what capacity?</li> <li>A I was a partner at Ernst &amp; Young when we had merged</li> <li>into Ernst &amp; Young.</li> <li>Q So you would have been a partner at Ernst &amp; Young after</li> </ul>
1 2 3	accounting firm environment, particularly with a firm that specialized in real estate, I believe I would be able to expand my use of those tools. Q How did you use the tools, to borrow your phrase, at Kenneth Leventhal? A They were used in many different regards. So I was brought in and Kenneth Leventhal had somewhat of a unique operating style unlike the other Big Four firms. Usually, meetings would involve an audit tax and consulting partner, I would be considered consulting person and decisions would be made in that context. Because if a valuation or real estate analysis was done it had impacts on how a structure might be or transaction might be structured and what the tax impacts might be and what the resulting accounting impacts would be. So I was the real estate side of that evaluation and analysis. And it afforded me the ability to work on many different things that were well outside the appraisal realm. Instead of doing single asset properties, I was advising and part of the team that was working on tax respinoffs of companies, divestitures, restructurings of debt and restructurings of company, the dispositions of portfolios and assets. So I was part of that team and that gave me a much	<ul> <li>-F. There were non</li> <li>accountants. The accounting firms were broadening their</li> <li>business scope into, a lot time at that time was information</li> <li>technology consulting, real estate consulting and all sorts of</li> <li>process improvement, performance improvement initiatives that</li> <li>were undertaken by accounting firms. They admitted a lot of</li> <li>nonCPA partners and I was among one of them.</li> <li>THE COURT: Just a moment. The question was do you</li> <li>have to be accountant to be partner at Ernst &amp; Young? If</li> <li>there's yes or no question, please just answer it yes or no.</li> <li>THE WITNESS: My apologies, your Honor.</li> <li>THE COURT: Okay. It takes a lot to get the hang</li> <li>of this.</li> <li>THE WITNESS: Thank you.</li> <li>Q How, if at all, did your responsibilities change in</li> <li>terms of your work after the merger?</li> <li>A I took on many managerial roles. Mainly, I was still</li> <li>based in the Los Angeles office and that was the largest real</li> <li>estate consulting office of Ernst &amp; Young. The reason why</li> <li>Kenneth Leventhal Group was a specialty group in Ernst &amp; Young.</li> <li>A t that time I oversaw a department of 75 people</li> <li>including eight partners. I was involved in a involving the Mall of America, it was the largest Minnesota. There was a dispute between the partners and subjects.</li> </ul>	al 1 rmation, 2 ng and 3 domain 4 we those 5 for time at 7 we those 7 for time at 7 matters? 10 lating to 11 inverse 12 natters? 10 lating to 11 inverse 12 natters? 10 lating to 11 inverse 12 for time at 15 for time at 15 for time at 17 for times 17 for time	It was concurrent with the time when property values in general were declining so that added to the damage claim that the property owner's suffered. I represented the MTA. I looked at the damage claim. I bifurcated the damages between market value declines in general and I evaluated the specific instance of what effect that subway construction would have on the property. I rendered the opinion that there was no inverse condemnation and, in fact, that those properties along that subway corridor were, in fact, benefited and demonstrated that in court. And it was resolved at my opinion with respect to the claim that there was no damage or inverse condemnation action with those properties. Q Outside of your testimony as an expert witness, were you involved in any other notable engagements at E & Y that are
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	Another situation notable in my career, I expert witness involving the State of Arizona condemn land through a master plan community. It was the largest condemnation matter, the damage claim w \$100 million. This is going back to the early 90 property owner had claimed that the properties were of because of the construction of the roadway improv I was representing the State and their Attorney rendered the opinion that there was no damage particular properties partly because the highest and best those properties hadn't changed as well as the acceler demand that would occur as a result of the construction improvements. It was a jury trial. And I had re basically no damage other than the physical land bein But there was no extenuating damages and the jury rule	was the 1 hation of 2 e states's 3 as over 4 l's. The 5 lamaged 6 ements. 7 General 8 to these 9 st use of 10 ration of 11 of those 12 endered 13 g taken. 14 ed at my 15	appraisal values. I did that for several years, every quarter reviewing appraisals performed by others of properties that were held by Calpers. Another notable one I was involved in, purchase price allocation of Pebble Beach, which was home of the U.S. Open. But there was a group of investors, Peter Ueberroth and Clint Eastwood who had purchased Pebble Beach in 1989 for 800-something million dollars. As part of normal subsequent acquisition purposes, usually the purchase prices are allocated for tax purposes because there's, my understanding, brief understanding there's different tax treatments for different allocations of property. So I was involved in the purchase price allocation involving Pebble Beach.
16 17 18 19 20 21 22 23 24 25	Lastly, another notable one was, which was Los Angeles was the Mid-Wilshire construction of an und subway. There was the Metropolitan Transit Authori the process of constructing an underground subway und Wilshire Boulevard. All the property owners who had their properties condemned filed an inverse condemnation against the MTA that their property values had dim Because of that subway construction even though their p	erground 18 ty was in 19 derneath 20 not had 21 on action 22 inished. 23	<ul> <li>Q To be clear, when you say Pebble Beach, are you referring to series of golf courses on the northern coast of California?</li> <li>A Yes, there are several golf courses. The most iconic being Pebble Beach, but there's Spyglass, and a public one, Monterey Golf Course as well.</li> <li>Q While you were at Ernst &amp; Young, were you also involved with the valuations of other golf courses other than Pebble Beach?</li> <li>A Yes. I have appraised and also been a part of a team</li> </ul>

Q What was your involvement what were your roles at Sagebrush and what did those roles entail? A My role was to help him improve his liquidity so that he could actually realize his growth plans. He had considerable land Holdings, so he was land rich and cash poor. In order to do so, it involved essentially a revamping of his entire organization. I had to recruit and bring in several experts in various departments. So land development, we needed much more discipline with respect to how the business was being operated. So my involvement there helped actively recruit
14 15 16 17 18 19 20 21 22 23 24 25	<ul> <li>profitability.</li> <li>Q Why did you leave Ernst &amp; Young at some point?</li> <li>A I did.</li> <li>Q Why?</li> <li>A I left in 1995. What was happening at that time, there was a federal regulation, Sarbanes–Oxley, S-A-R-B-A-N-E-S</li> <li>O-X-L-E-Y, that came into law which effectively limited the amount of work other non-accounting work that accounting firms were doing.</li> <li>Ernst &amp; Young was very concerned about Sarbanes-Oxley.</li> <li>And all the consulting businesses like information technology, management consulting, process improvement, many of the ones I</li> </ul>	14 15 16 17 18 19 20 21 22 23 24 25	some key people that started to build the organization. Concurrently with that, I sought to seek liquidity for the company and located the source that would provide secured financing to the company. And started the process of essentially preparing the company and then executing raising capital for the company. We put a credit facility together of about \$525 million. It was reviewed by the RAID agencies. I made all the presentations to the raid agencies, formulated it was in front of the RAID agencies and other investors who were funding this 525 million. It was a significant key to the success of the
1 2 4 5 6 7 8 9 10	Chin-Defendant Direct-by Mr. Fields- Page 5876 mentioned, including real estate became under fire. I think Ernst & Young was very concerned about that. So at that time I was doing quite a bit of real estate litigation work. I think the pinnacle for me was I was going to be the expert on the World Trade Center one-occurrence two-occurrence situation. I had developed a damage theory regarding the two occurrences. As we normally do before we accept litigation assignments, we run a conflict check sadly, Ernst & Young audits most of the reinsurers that were insuring the loss and said there's no way you could do this.	1 2 3 4 5 6 7 8 9 10 11	Chin-Defendant Direct-by Mr. Fields- organization because at the time the company had no more than \$10 million of liquidity and lots of land holdings so now the land holdings and capital that was available was more in balance so that we could achieve the growth plans. Subsequent to that, I then tried to acquire on behalf of the company a private, publicly registered privately traded company in Albuquerque, New Mexico, which had owned 54000 acre of land. I had essentially secured the right to acquire that on behalf of the company. As part of that, I raised a 250 or \$275 million credi facility to support that. That transaction did not go through We were overhid at the final curtain and did not acomplete the
12 13 14 15 16 17 18 19 20 21 22 23 24 25	I had repeatedly run into situations where the conflict of interest was precluding my ability to do litigation work. In the context of expert witness litigation work it is usually the individual that gets hired and then the firm comes along with it. And that was probably the final straw that caused me to leave. Q Where did you go next? A After that, and actually prior to that I was consulting with a private home builder and land developer in Las Vegas. I had approached the subject of actually being on the other side of the table, being on the operating side instead of the consulting side and I joined him as chief operating officer. He had large growth plans, a lack of liquidity and needed access to additional dollars to fund his growth plans.	12 13 14 15 16 17 18 19 20 21 22 23 24 25	<ul> <li>We were overbid at the final curtain and did not complete that transaction.</li> <li>Q What were your actual titles at withdraw that I think you said this company that you were with was called Sagebrush Enterprises?</li> <li>A Yes, that was the parent company.</li> <li>Q What were your titles while there?</li> <li>A I was the originally hired as the COO and then ultimately became the CEO of Sagebrush.</li> <li>Q And after Sagebrush did you stay in the Las Vegas area?</li> <li>A I did, yes.</li> <li>Q What was your next stop for employment?</li> <li>A I was so I left Sagebrush after I thought I had completed what I needed to do. I was named as Chief</li> </ul>

(CONTINUED) DIRECT EXAMINATION: Q All right. In terms of an appraiser's perspective, how do appraisers when doing market value appraisals, how do their perspective affect the ultimate value of the property? A It is very influential. It is the analysis, the beliefs, the perspective of appraiser that goes into how they interpret sales or projected income that might be received or occupancy or essentially the direction of the market if it is increasing or decreasing. Q And what sorts of information do appraisers generally look to in arriving at a value conclusion? A The value conclusions are grounded in historical information. So what has transpired in terms of economic growth or sales that have been transacted as opposed to listings or offers to purchase. They rely on those facts and put those pieces together to formulate their perspective of a property. Q In your experience do developers typically have a different perspective? MR. AMER: Objection. 1	A. There's a significant difference between passive	1	time.
2	owners and developers. It is all premised on construction	2	MR. FIELDS: Sure.
3	risks.	3	THE COURT: These are tough questions.
4	So you have construction risks which is the taking	4	(Whereupon, the following proceedings was
5	on the risk of building something excuse me on time,	5	stenographically recorded by Deborah Rothrock.)
6	on budget. And, hopefully, the market will be strong enough	6	
7	to demand the product you're building. That is risky.	7	
8	A lot of times things do not go as planned. Costs	8	
9	are overrun, the time it takes to build is too long or some	9	
10	other factor happens.	10	
11	Notwithstanding that during that construction	11	
12	process, the market cycle could change, that, it could go	12	
13	from being very strong to very weak as you're still under	13	
14	construction.	14	
15	Contrast that with a passive owner, which would,	15	
16	generally, buy it today. They know what they have, they	16	
17	don't have to undertake any sort of construction risk and	17	
18	start producing income right off the bat if they own an	18	
19	office building.	19	
20	So, that construction period. And then, there's	20	
21	the lease up, that, I have to fill my building once I build	21	
22	it. So, massive risks in this "as if" scenario. But,	22	
23	they're rewarded if they, essentially, bet right.	23

1	MR. AMER: I'll object and move to strike. I think	1	A Yes, I believe so.
2	the question was: How frequently does it happen.	2	Q And generally speaking, in 2011, 2012, what were the
3 4	THE COURT: Was that indeed the question? MR. FIELDS: I have to go back and look.	3	sentiments that the appraiser was suggesting with regard to the market at the time?
5	(Whereupon, there is a pause in the proceedings.)	5	A The sentiments or attitudes were clearly negative in
6	Q Sure. How frequently do developers seek the land	6	2011. If you recall, again, it is coming out of the great
7	use	7	financial crisis in 2008. So there's many cautionary statements
8 9	THE COURT: I'll strike the prior answer, prior answer is stricken. Go ahead.	8 9	made in the 2011 valuation report that are reduced in quality and number in 2012.
10	Q How frequently do developers seek to change land use	10	So there's much more negative sentiment that is
11 12	restrictions that might currently encumber a property that the developer is seeking to change in the future?	11 12	expressed in the appraisal, warning signs, uncertainty indications regarding the financial markets here and
13	A As frequently as they can.	13	unemployment, which lessened in its quantity and I guess
14	Q Did you review in this case appraisals for 40 Wall	14	disclaimer amount in the 2012 report.
15	Street done by Cushman & Wakefield for the years 2011, 2012 and	15	Q In your experience, in this timeframe, was it common
16	2015?		for appraisers to have negative sentiments in 2011 and 2012?
17	A Yes.	17	A Yes, it was uncertain. It was an uncertain time coming
18	<ul><li>Q Were those "as is" or "as if" appraisals?</li><li>A Those were "as is" appraisals.</li></ul>	18 19	out of 2008. And the rate of recovery at that point wasn't clear.
19 20	Q In the years 2011 and 2012 were there multiple values	20	(Whereupon, Cheryl-Lee Lorient relieved Deborah
21	and if so, what were those values?	21	Rothrock as the official court reporter.)
22	A There were two different values that I recall. In	22	(Continued on next page.)
23	2011, I believe, it was 200 million. And in 2012 it was 220	23	
24	million.	24

	Q Now, I believe in connection with preparing your May expert report you reviewed accounting literature, right?	8	Is that the definition you had in mind for estimated
9	A Yes.	9	current value when you were preparing your expert opinions?
10		10	MR. FIELDS: Objection, same objection.
11	Q And among the accounting literature you reviewed was	11	
12	AASC 274 which governs personal financial statements; is that	12	THE COURT: You're comparing apples to elephants.
13	right?	13	I really don't understand. Nothing somebody could say, you

There are two separate terms defined differently, yes?</li> <li>A. It does appear that way, two different agencies have different this is the office of the Office of Comptroller of Currency and the other one says, "agency." And, I'm not sure what agency that is.</li> <li>Q. And the "as is market value" says, "The estimate of the market value of real property in its current physical condition use and zoning as of the appraisal date." That's your "as is" valuation, correct?</li> <li>A. Correct. That's what's defined.</li> <li>Q. And market value, which is defined on the next page, which talks about buyer and seller, that includes the concept of "as is" because, it can take into account future development of the property; isn't that right?</li> <li>A. A Yes, under the USPAP standards, correct. Q You're familiar with something known as an appraisal review under USPAP? A Yes. Q And I think you testified about some notable cases that you handled and you mentioned a case involving Calpers. Did I get that right? A It wasn't a case, it was an ongoing consulting assignment. Q And I think you said that for that Calpers assignment you reviewed dozens of appraisals; is that right? A Yes, every quarter. Q Were those appraisal reviews?

	<ul> <li>A As following USPAP, correct.</li> <li>Q And you complied, I presume, with those standards when you did the appraisal reviews for the Calpers engagement; is that right?</li> <li>A Generally, I believe we had an agreement that I was doing file memoranda, that basically, I think, mimic USPAP, but it wasn't per se. I don't know if it was verbatim how bank appraisers do an individual appraisal review for very specific property.</li> <li>MR. AMER: Let's go ahead and look at Plaintiff's Exhibit 3397 which are the USPAP standards. (Shown.)</li> <li>Q Let me ask you just to confirm something. This says that they're effective through December 31st, 2021.</li> <li>Is it your understanding that these standards have been extended through the end of this year?</li> <li>A I believe so.</li> <li>MR. AMER: So, your Honor, if we could, I would distribute this exhibit. This is a new exhibit, it is not in evidence. (Handing.) THE WITNESS: Thank you.</li> </ul>	2 3 4 5 6 7 8 9 10 11	<ul> <li>opinion about the quality of another appraiser's work, they need to comply with USPAP Standard 4 which relates to appraisal reviews, correct?</li> <li>A Yes, if there's an assignment to do a specific appraisal review.</li> <li>Q And you did not believe that your critique of the 2011 or 2012 Cushman appraisals triggered your obligation to follow those standards because in your view you were weren't doing an appraisal review; is that fair?</li> <li>A Correct.</li> <li>Q And so you, in fact, did not follow the standards laid out USPAP for engaging in the act or process of developing an opinion about the quality of another appraisers's work, right?</li> <li>A No, that is not correct.</li> <li>Q Did you let's look at 4.3, which is on Page 30. You see Standard 4.3 requires a certification as an integral part of the appraisal review report; do you see that?</li> <li>A Yes.</li> <li>Q Can we agree you did not produce a signed certification that meets the requirements of 4.3?</li> <li>A That's correct.</li> <li>MR. 24 25	Q And if we could turn to Page 5 of 34. You'll see there's a definition of Appraisal Review.	24 25	(Whereupon, there is a pause in the proceedings.) THE COURT: Let's go ahead.
1 2 3 4 5	Chin-Defendant-Cross-by Mr. Amer- Do you see that? A Yes. Q I'm going to read it: "Appraisal review when used as a noun means the act or process of developing an opinion about the quality of another appraiser's work, i.e., a report, part of a report, a work file or some combination of these that was performed as part of an appraisal or an appraisal review assignment." Do you see that? A Yes. Q Because we've established that you rendered an opinion about the quality of the Cushman 2011 and 2012 appraisals, would you agree that your opinions constitute an appraisal review as defined by USPAP in this paragraph; yes or no? A No. There is something that Q I just asked yes or no. You've answered my question. So it's your view that what you did with respect to the 2011 and 2012 Cushman appraisals was not appraisal review as defined by USPAP; is that your testimony? A Yes. In the context of the overall statement of financial condition and as I recorded in my report which was looking at the totality of a Statement of Financial Condition and the various entries for all the different properties in all the different years. Q When an MAI does an act or process of developing an	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25	Page 6026 MR. AMER: Your Honor, I have no further questions. THE COURT: We can break five minutes early. MR. AMER: Well, do they have re-direct? THE COURT: Could you start your re-direct? Are you going to have re-direct. MR. I started at the Law Firm of Schultz & Bowen in Miami, proceeded to the firm of Sterns Weaver and then started my own firm in 1993. Q. Sir, what if any specialty are you engaged in the practice of law in? A. For the last 20 years, in particular, I've focused on real estate as it relates to entitlement, land use, planning. Anything that relates to real estate.	24 25 Proc 1 2 3 4 5 6 7 8 9 10 11 12	land that are secured by the owner to allow certain uses of that property. Page 604 Q. And finally zoning? A. Zoning is the implementation of planning. It's the rules and regulations that govern the use, the intensity, the density the shape of property. Q. Now, you mentioned before that your practice is, primarily, limited to this over the last 20 years. How muc of your practice is devoted to these four areas? A. Probably it was always about 50 percent. Now its about 80 percent. MR. ROBERT: Your Honor, at this point, I would like to tender John Shubin as a land use, planning, entitlements and zoning expert. THE COURT: Can you repeat that slowly. MR. ROBERT: Sure. Yes, your Honor. Land

I think it may be angles dancing on the head of a pin at this point, but I happy to have it flagged so that it is in the record and the fact is what was included in his expert report. THE COURT: All right. Let's make sure we're on the same page.</li> <li>Plaintiff, are you agreeing that its expert report that Mr. Shubin submitted on the summary judgment motic could be included in the appeal of the trial?</li> <li>MR. WALLACE: Yes, perfectly acceptable.</li> <li>MR. KISE: I'll also note that the angels dancing on the head of a pin are the province of the Appellate Court, that is why we're engaging in the exercise. THE COURT: Sometimes I feel like I'm the anglancing on the pin. All right. Thanks for dealing withat. Let's get the witness back.</li> <li>MR. ROBERTS: Yes, sir. THE COURT OFFICER: Witness entering. (Witness enters the courtroom.)</li> <li>MR. ROBERTS: Could I have the last question reback to see where I left off.</li> </ul>

Then you talk about net worth of guy that have over a hundred billion dollars which to me is staggering. It's incredible. If I had the right properties, like a Mar-a-lago or something of its caliber, I would have people that woul want to obtain it. The problem is, it's hard to get properties like that. They don't really often come up. They usually come up through attrition. People die. People change their mind or move to a different pa of the world. But, they don't often come up. Q. In addition to Mar-a-lago, were you asked to valu 1094 South Ocean Boulevard? A. I was. Q. What is 1094 South Ocean Boulevard. A. Single family home. Located just north of Mar-a-lago. Q. And do you know how big a parcel that is?

Well, beachfront, generally, is hard to get anymore in Palm Beach. I fortunately have a house on the beach and bought it 21 years ago. Thank God I bought it because, I wouldn't be able to afford it in today dollars. Q. Do you know how much beachfront area Mar-a-lago has? A. Mar-a-lago has 365 feet on the ocean. I think it's similar on the lake. But, it might be a little different. MR. ROBERT: Before we leave Mar-a-lago and go to the other properties, I'd like to show the witness Defendant's Exhibit 4782 in evidence. Q. And I draw your attention, specifically, to page three actually, let's start at the first page for a minute or the second page actually. Do you recognize this document, Mr. Moens? A. I do. Q. And what is this document? A. Well, it's regarding the club. It's special exception use and preservation plan. Q. What is the year of this document?	25 L.Mc 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	billionaires that can afford to buy expensive housing. Dens - Defendants - Direct/Mr. Robert Page 613 Before just a few years ago, there were no homes for over a hundred million dollars. They didn't exist. They do now. The wealth isn't, you know, a hundred million dollars anymore. I still think that's a lot of money. Buy now you're talking billion. And then, you're talking billion of billion. Then you talk about net worth of guy that have over a hundred billion dollars which to me is staggering. It's incredible. It says that you advised a value \$2,750,000, and that matches the reported value in the SOFC, your value now is \$4,950,000. Do you see that? A I do, but that's easily explained. Q That's okay. My question is actually, did you hav more detailed understanding of the Palm Beach market as it st in 2013, at the time of the email, August 14, 2013, or Augus August 2013 or today, a decade later? A The email left two important things out. Q That's not the question. My question is simply, v your knowledge of the market, as it existed in 2013, better August 2013, or ten years later, in 2023? A I would say it's the same. Q So there's been no loss of knowledge over the ty years? A I hope not. I think I still got my marbles.

So this is one paper. Another paper was to see how whether investors valued, correctly, multinational companies. So multinational companies its very, very challenging to value because, they have operations all around the globe. And, they run operations in different currencies. So, you have U.S. companies that have operation in Japan and in Europe and in Asia. And how you report results of the operation of such company? So, we develop a model and we show how one way to value these companies. Q. And what papers have you published concerning financial reporting misconduct if any? A. So, I reported several papers on financial reporting misconduct. The last paper I published in the accounting review, which is one of the leading academic journals of the world, has to do with how investor says they inadvertent error and fraudulent errors in financial statements. Q. How is the subject of valuation covered in the courses that you teach? A. Well, I am an accounting professor. So there are	24 25 A.Ba 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Street, like Muddy Water's Research or Hindenburg Research artov - Defendants - Direct/Mr. Suarez Page 6 that all they do is looking for fraud that was undetected the market. They take short portion on the stock; meaning, they would get profit if the stock go down. And then, the advertise their findings. And if the market believe the the stock might drop and they make a lot of money. Maybe the most famous story was Jim Chanos st in 2000. He was young hedge fund person. And Jim Chanos was one of the first to uncover the fraud in Enron. So, he took huge short positions well before may other people realize it. And he continued to increase short position, during the year, as Enron released more more information. And he prepared the analysis correct Figure out that all this information is fraud. And, at the end, when Enron went bankrupt, im December of 2001, he made billions of dollars. So, ne everybody lost money on Enron. Some people the one can detect financial fraud before everybody else, thes people, actually, make a lot of money. Q. And how are the affects of financial reporting of

2 Q And can you give me, Professor, an example of a time	<b>2</b> assets.
<b>3</b> when GAAP results in undervaluing of the true economic value of	<b>3</b> So, but what is the consequence? The consequence is if
<b>4</b> a company?	<b>4</b> you edit the economic value of the brand name to the statement
<b>5</b> A There are many example like that. One example would be	<b>5</b> of financial condition, the net worth would be \$3 billion
<b>6</b> Coca-Cola. Coca-Cola, if you look on the financial statement,	6 higher. So in other words, if you look at it this way from the
7 the most recent annual report, according to the balance sheet	7 economic prospective, the net worth of the statement of
8 the net worth of Coca-Cola is \$25 billion. If you look on the	8 financial condition is really understated not overstated.
<b>9</b> market cap, our market, the stock market, that value of	<b>9</b> Q What is the difference between price and value,
<b>10</b> Coca-Cola, the value of Coca-Cola is \$250 billion, ten times	<b>10</b> Professor?
<b>11</b> more, ten times more than the net worth based on the balance	<b>11</b> A So, price is an objective measure of value derived from
12 sheet.	<b>12</b> an market transaction and this is objective because it's
<b>13</b> Q Why is that, Professor?	<b>13</b> determined by the market.
A The reason again is another example of GAAP limitation	<b>14</b> Q And are there any other objective, objective measures
<b>L5</b> because according to GAAP, internally develop, intangible asset	<b>15</b> of value?
<b>.6</b> such as brand value cannot be reported on balance sheet. It is	<b>16</b> A Not that I am he aware of. I think that the price is
<b>.7</b> an economic asset. It may be the most important economic assets	<b>17</b> the only objective measure of value. Price derive from a market
<b>18</b> that Coca-Cola own. But because of GAAP limitation, because	<b>18</b> transaction not, for example, price that derive from related
<b>19</b> GAAP does not attempt to provide economic values, GAAP said you	<b>19</b> party transaction or anything like that. So the price is
20 cannot put these valuable assets on your balance sheet but	<b>20</b> derived from a market transaction, then the price is objective.
<b>21</b> investors do their homework and they say the fact you didn't put	<b>21</b> And I don't know any other measure of value that would be
22 it on the balance sheet doesn't mean anything to us. We know	<b>22</b> objective.
<b>23</b> that the numbers cannot be used as reported. So this is known	<b>23</b> Q What is a valuation then, Professor?
<ul><li>as latent assets. Latent assets are unrecognized. Latent</li><li>assets means assets that are there but you cannot see them.</li></ul>	<ul><li>24 A Valuation is an opinion. It's an opinion on price.</li><li>25 It's an opinion on price derived from a valuation model.</li></ul>
<ol> <li>They are intangible asset. According to GAAP, you cannot record</li> <li>them on the balance sheet. Investors do their homework, but</li> <li>they price the stock as if these assets were on the balance</li> <li>sheet. So in this case, the market valuation is much, much</li> <li>higher than the net worth according to GAAP.</li> </ol>	<ol> <li>Q Are valuations objective, Professor?</li> <li>A By definition, they cannot be objective because they</li> <li>are opinions. Opinion can never be objective. So valuation are</li> <li>subjective. Price is objective.</li> <li>Q How is an asset valued for purposes of GAAP?</li> </ol>
6 Q And how is the example that you just used in Coca-Cola	<b>6</b> A Well, for the purpose of for any purpose, when you
7 similar to the issues in this case?	7 do a valuation for any purpose, you first have to pick the
8 A Well, if you look on the statement of financial	8 definition of value. There are many different definition of
<b>9</b> condition, it's obvious that the major, major effort is missing	<b>9</b> value and each definition obviously will give a different
<b>10</b> from the statement and this asset is the brand value of the	<b>10</b> valuation. So the first step in valuation process is to pick
<b>11</b> Trump Organization. There is no question that the brand value	<b>11</b> the valuation of value. For example, in GAAP, there are four
<b>12</b> of Mr. Trump, President Trump worth billions. There is no	<b>12</b> different definition of value. Each definition will give you
<b>13</b> question about it. And actually there is evidence in the case	<b>13</b> different valuation. Once the valuator pick the definition of
<b>14</b> that it off about \$3 billion, but it is nowhere to be found on	<b>14</b> value, the second step would be to pick a valuation model in
<b>15</b> the statement of financial condition. Why? Because there's a	<b>15</b> assumption and to produce the valuation.
<b>16</b> statement of financial condition clearly states they follow GAAP	<b>16</b> Q And in the case of a personal financial statement or a
and GAAP does not allow to include brand value that was	<b>17</b> statement of financial condition, what perspective must a
<b>18</b> internally developed as a standard alone asset.	<b>18</b> preparer use in preparing a valuation?
<b>19</b> This should not be confused with using, considering the	<b>19</b> A Well, when you when a user I mean, a preparer
<b>20</b> fact of brand value on the value of tangible asset. Tangible	<b>20</b> produce financial statement based on the provision of ASC 274,
assets like hotels and gulf courses they are valued under a	<b>21</b> they have to follow the definition of value that is provided by
<b>22</b> different GAAP and this GAAP require that when you do the	<b>22</b> ASC 274 which is very unusual. It is used nowhere else in in
<b>23</b> valuation you include the brand value effect on the value of the	<b>23</b> the qualifications and this is the estimated current value.
<b>24</b> tangible asset. So the fact that the statement of financial	<b>24</b> Estimated current value is the definition of value according to

So, obviously, if you take all of this together, Q And how, if at all, Professor, is this concept laid out 8 8 9 even under the same definition, different people will pick 9 by Professor Damodaran applied in connection with the different models, different people will pick different preparation of statements of financial condition under ASC 274? 10 10 11 assumptions, you'll get different answers. 11 A Well, the implication is that under ASC 274 you have to 12 Q And how is a statement of financial condition prepared 12 value all the assets based on estimated current value. An under ASC 274 different, if at all, than a financial statement estimated current value in the current situation must be used 13 13 prepared otherwise under GAAP? 14 14 valuation model, and it means that if the preparer use valuation 15 A So, ASC 274 in the way I see it I consider the 15 model and come up with a value, obviously, if you ask other people they will come up with different values. 16 stepchild of GAAP because the provision there are in many cases, 16 17 many cases are at odds with provisions in other -- in other 17 So the fact that some people with varying level of standouts. For example, the key -- one key element of ASC 274 expertise or maybe no expertise come up with different values 18 18 19 is obviously the notion of estimated current value. than what is in the statement of financial condition, there is 19 20 Now, those are confusion among preparer because this 20 no evidence, there is no evidence that anything is wrong with notion of estimated current value is so confusing. So there was 21 the valuation in the statement of financial condition. It just 21 22 a confusion because in most of the standouts the definition of means that these people have different opinion. 22 23 value is fair value. It is not estimated current value. If you 23 Q And what are the subjective judgments that a preparer 24 use fair value, you got a completely different valuation than if 24 of a statement of financial condition under ASC 274 must make, 25 Professor? you use estimated current value. 25

Fair value one the definition is the amount at which in asset could be sold but, are sold in a current transaction between willing parties; that is, other then in a forced or liquidation sale. Q. How is the definition of fair value one used in GAAP? A. Well, it's hard to understand the definition without referring to the implementation guidance. Implementation guidance and the definition go together. If you look on the definition alone, it's like you look on GPS on ways when they first show you a picture of the general big map and they show you point one point A point B and they show you a straight line. So, they just tell you "Hey, you have to go east 20 miles" and it will take you half an hour. But they don't give you exact direction how to get there. Then, they show you another slide where they give you specific direction how to get there. You go to this street, you go to that street, et cetera. So, you cannot understand how to get from point A to point B by looking on the first screen of ways much. Same thing is here. This is the first screen of Waze.	24 25 A.Ba 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	<ul> <li>and cannot be interpreted. If we look at demonstrative DD8.6, which I believely your Honor has permitted me to put up on the screen, it's the estimated current value implementation guidance. THE COURT: Yes.</li> <li>Q. Each definition of value will result in different valuation.</li> <li>Q. Can we put the two upside by side?</li> <li>A. Okay. So, you see that they say there "All net realizable value." Net realizable value is a term of art. It's defined in the master glossary of the codification. And so, what does "net realizable value" means? It means, estimated selling price in the ordinary course of business.</li> <li>What does this mean, "estimated selling price in the ordinary course of business?" This means that the entity this means that the entity will, from their perspective, from what they believe, they will pick up th price that they believe that they believe they will receive when the asset will be sold. Not today. Somedar when the asset will be sold.</li> <li>What is the someday? The someday is determined by a revenue focused model. So the preparer of the</li> </ul>	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 7 18 19 , 20 21	<ul> <li>the idea of net realizable value.</li> <li>Now, why I mention it because, net realizable</li> <li>value as you can see if you go back to the implementation</li> <li>guide, if you see the net realizable value is closely</li> <li>related to estimated current value.</li> <li>Estimated current value is not the value today.</li> <li>It's the value of the asset someday. And "someday" mea</li> <li>when the asset when can you go to B.</li> <li>So what is "someday." Someday is based on the</li> <li>plan course of action. So the "someday" will be when you</li> <li>complete your all your plans. This will be when you make the valuation call.</li> <li>So let's say you have a lot today that you bought</li> <li>it for a million dollars today. But, after</li> <li>five years you believe that once you complete the building of the hotel you can sell the hotel for fifty million dollars. I say every day to my student in class, in accounting, every word matter, every single word matters. If you switch there is a reason there is a FASB is not in the business of confusing preparers and users. They would not use two different definitions if they meant the same thing. So the reason we have two different definitions is they are completely different meaning and would and could is one of the reasons that fair value is substantially different than estimated current value.</li> <li>Q All right. 10 11 12 13 14 15 16	from the perspective from the entity. The entity has to come up with what they believe the value would be after they completed their plans and they believe that they would find a well-informed seller meaning a seller that will be aware of all of the plans and will price the asset accordingly. And this is a huge difference between marketable participants because marketable participants do not know the	<ul> <li>A So materiality test consist of two step. You have to quantify</li> <li>the error and there is a process that you have to follow in</li> <li>quantifying the error.</li> <li>Number two, once you quantify the error, you have to</li> <li>decide whether it is material or not based on qualitative</li> <li>effector. Market participant is just general knowledge about the market. And based on this, they determine the value so it is a huge difference. If you use fair value in market in estimated current value, you would get, as the definition of value, this would get you for the same asset huge difference in valuation. Q And why does GAAP permit a huge difference in valuation	<ul> <li>value of the number, the one say many times, the absorber</li> <li>value of the number by itself does not tell you whether the</li> <li>error was material or not. You can only decide if an error is</li> <li>material, and therefore it is a valuation of GAAP, only if you</li> <li>apply the qualitative analysis.</li> <li>Q Is there a mathematical test to determine whether</li> <li>something is material?</li> <li>A No. Materiality test, materiality test relies a lot on</li> </ul>

When you apply estimated current value, you get only one value for each asset based on the plan causes of action of the entity. Q And how, if at all, Professor, is the concept of	<ol> <li>is to identify a misstatement. It's all in the document.</li> <li>Q And why does it all have to be in the document, Professor?</li> <li>A Because any bank has to have the accommodation because there is review and another review and another review. This is done by one person. But then a few other person few other people have to double and triple check to make sure that the process was correct and to approve the loan so everything must be in writing.</li> </ul>

SUAREZ: Q And what ability would President Trump in this instanc have to self-finance projects instead of relying on a loan? A Say it again? Q Yes. What ability, having read his statement of financial and at least as of June 30, 2013, did President Trump have to self-finance his projects as opposed to doing business with Deutsche Bank? A Absolutely, absolutely able to self-finance most of the project. He didn't need the loan from the bank to do that. Q And how does a rational economic actor decide whether to do business with a bank and use a loan or deploy his own cash typically? A It simply depend on the interest rate. If the interest rate is low enough you would borrow. If the interest go highe

And if the rate is too high your best next economic option would be to self-finance it. December 7, 2023 Professor Bartov - by Defendant - Direct (Mr. Suarez) Page 6338 Professor Bartov - by Defendant - Direct (Mr. Suarez) Page 6340 1 relevance. It is beyond the scope of what this witness has 1 believe is the 2013 statement of financial condition. If we can 2 been qualified as an expert for. It is also beyond the 2 turn to the accountant's compilation report on page one. What 3 scope of anything that I think with we can figure out was is the accountant's -- independent accountant's compilation 3 4 disclosed in his expert report. 4 report communicate to the user? 5 THE COURT: That might be the easiest, the last 5 A Well, it communicate to the user that, first, the 6 one. Is there anything in the expert report about detecting 6 compilation was done by a certified public accountant not by the 7 financial fraud in statements? 7 company alone and, second, it provide information that the 8 MR. KISE: He discussed in his expert report, and 8 accountant concede they are important to the users of this 9 we can look at it overnight to provide specific examples, 9 financial statement. but he discussed in his expert report his analysis process Q And why is this important for the user of the financial 10 10 statement to understand? 11 and financial reporting misconducting, the nature of the 11 12 financial reporting misconduct, may have been in his second 12 Because if he understand -- if this information is А report. I don't know if it was in the first report the one 13 13 relevant, it will help them in their analysis because as I said that related more to specifics. But, again, he can't -- he 14 14 before they -- the statement of financial condition and the 15 can't put in his report every last thing. It is the subject information in the statement of financial condition is only the 15 matter and so, yes, I can say the subject matter is there. first step in a long process. So, the comments in the letter of 16 16 17 MR. WALLACE: We have not found the words fraud or 17 the independent accountant compilation report supposed to 18 misconduct in his report. 1	THE COURT: You spoke a lot about the triplex	1	A. A misstatement is the difference between the
2	already. Let's move on from the triplex.	2	required number, required disclosure or required
3	(Continued on next page)	3	classification in the financial statement and the actual
4		4	number, actual classification, actual disclosure, in the
5		5	financial statement. So it is the difference between what's
6		6	required and GAAP and what was reported. This is
7		7	misstatement.
8		8	THE COURT: That's his answer. Whatever.
9		9	Q. And setting aside consideration of the Triplex,
10		10	have you identified any misstatements in the Statement of
11		11	Financial Condition?
12		12	A. Well, I did not look for misstatement. I
13		13	looked I just was guided by the complaint. So I list all
L4		14	the misstatement that were alleged in the complaint and I
15		15	tried to evaluate whether they are misstatement or not.
L6		16	And as I said before, most of the allegation about
L7		17	misstatement in my mind are not any stated at all.
L8		18	Obviously, plaintiff was not helpful in provide any clue
L 9		19	what is the provisions of the GAAP provisions that, based on
20		20	which, they decided that this is a misstatement.
21		21	So again, as I told you, I have to use all the
22		22	knowledge that I have, and I have to review the literature
23		23	and I have to review the codification trying to find a basis
24		24	for the allegations. And, in most cases, I could not find a
25		25	basis.
н.Ба 1	rtov - Defendant - Direct/Mr.Suarez Page 6347 Q. What is an intentional misstatement?	1	eedings Page 6349 As I said, in the Triplex I did find a basis.

1	Donald J. Trump. And, for example, on page eight, if you can go	1	fraud and there's a, you know, street definition of
2	to page eight, the total portfolio of the 4 Trophy properties	2	fraud. But, all right, I'll strike the conclusion
3	was valued at 1.6 billion by Trump, was valued by 1.2 billion by	3	that the statement about fraud because, that's a
4	DB. So you see substantial differences here. And you see that	4	legal conclusion.
5	the total portfolio was valued by Donald Trump is 3.6 billion	5	MR. KISE: Well, your Honor, consistent with
6	and by DB was valued at 2.1 billion.	6	our agreement, is the objection the word "fraud" as
7	So, obviously, they use their own numbers for, you	7	opposed to the word "misstatement" back to where

9	decision. They did not rely on the numbers reported by Donald	9	MR. WALLACE: Misstatement versus fraud is
10	Trump and the reason is obviously. They used different	10	different. And if they want to clarify that this is
11	definition of value. So when you use different definition of	11	based on that review that he performed and only that
12	value, you get different valuations.	12	review. That's fine.
13	Q And if I could ask you to take a look at Plaintiff's	13	I will, though, note this is all cumulative.
14	Exhibit 298.	14	This has been covered extensively. And he keeps saying
15	(Continued on next page)	15	these things are obvious. Which would suggest they're
16		16	not an appropriate subject for expert testimony.
17		17	But I'm going to stick to the fraud objection
18		18	the way it was put in by the witness. If they want to
19		19	redirect him on that, you know, we may not object.
20		20	MR. KISE: He can just ask another question.
21		21	But, it's not obvious. It's obvious to someone with 40
22		22	years experience.
23		23	THE COURT: You don't have to go over that
24		24	part. I'll strike the word "fraud" as "a legal
25		25	conclusion." And we'll substitute "misstatement" is
1	Q. If I can ask you to look at Plaintiff's Exhibit	1	that
2	298.	2	MR. KISE: He can ask him the question
3	And, again, I'll ask you if you recognize this document. Let's keep the full document up.	3	again. He can use the word misstatement. Fine. I
4	A. Yes, this document, again, is prepared by Deutsche	4	mean, I think we're really descending to a very narrow
5 6	Bank Private Wealth Management, their risk management group.	5	dispute here that's pointless. But, nonetheless THE COURT: And to the extent that there's
0 7	And, this is, again this is annual report. They do an	6 7	an allegation that we're plowing the same field, it
, 8	annual review. And this is dated July 20, 2015.	8	seems like dèjá vu to me.
9	Q. What conclusion, if any, Professor, did you reach	9	MR. KISE: Right, but no one is getting it.
10	about whether Deutsche Bank relied on President Trump's	10	That's the problem. No one is getting it. I think the
11	Statement of Financial Condition in 2015?	11	folks in the back are getting it at least, from what
12	A. So, again, if you go to page eight on this report,	12	I saw yesterday. I think they're getting it. I think
13	you see that they listed, again, the valuation by Donald J.	13	they're seeing what's going on. But, I don't think
14	Trump in their own valuation. And, again, you see	14	anyone else in the courtroom, except at this table, is
15	substantial differences. Donald J. Trump used 4.3 billion	15	getting it. So that's why we have to have witnesses
16	for the valuation. For their purposes, they use 2.5 billion	16	come in and lay it all out particularly them.
17	valuation.	17	THE COURT: Without responding to the
18	So obviously there is considerable difference	18	allegation that plaintiffs are not getting it, that
19	between the Donald J. Trump number and DB number. This is	19	would not be a reason to go over it again if somebody
20	not fraud or an error. This simply because they use	20	didn't get something.
21	different definition of value. And, this is totally	21	I could summarize his testimony but, then
22	expected.	22	we'd have to ask him to leave the room. But, I don't
23	MR. WALLACE: Objection. Move to strike the	23	want to bother to do that. He's saying the same thing
24	portion about fraud.	24	he said yesterday.
25	THE COURT: There's a legal definition for	25	MR. KISE: But, they objected to it

AG was supposed to value this asset not by liquidation value, which is not recognized by GAAP as a legitimate methodology. They were supposed to value it based on estimated current value. So you would expect their valuation for each and every asset to be higher than the valuation of Deutsche Bank. If their valuation is even lower than the valuation of Deutsche Bank, it tells you that something is that their valuation is it's an indication that their indication is unreliable to me as an expert in valuation. 1	that we overvalued our properties and the correct value	1	way, this gets us back to something that I had said and you
2		2	disagreed and we never really discussed it. To me, the case
3		3	isn't about valuation. It's about statements and financial
4		4	condition. Section 6312 in the Executive Law basically says you can't use false statements in business. That's what the
5		5 6	summary judgement motion was decision was all about. I
7		7	think it is pretty much what the rest of this case is about.
8		8	So whether a particular property is worth "X" dollars or "Y"
9		9	dollars, that's not what the case is about.
10		10	MR. KISE: So how then so then, respectfully,
10		11	this is a completely rudderless ship. You are just going to
12		12	determine on your own whether the right values, whether
13		13	there is a misstatement of values based on your own
14		14	determination. That's why we have experts.
15		15	MR. WALLACE: We are rearguing summary judgement.
16	•	16	THE COURT: I'm not determining values.
10		17	MR. KISE: The only way to know if there is a
18		18	misstatement is to know whether the value is correct. The
19		19	statements contain values. That's it. If the value of
20		20	Trump Tower is acceptable and accurate under accounting
21	_	21	principles and it's done correctly, then by definition there
22		22	can't be a misstatement. We just can't make up
23	-	23	misstatements like the Attorney General wants to do and say

3		2	like 490. It's wrong. Why it wrong? If we don't get down
			to the value and why the value is wrong, there's no way to
4		4 5	determine it. You can't just say it is a misstatement
6		6	because we feel like it. There has to be a standard.
7		7	Otherwise, it's completely
8		8	THE COURT: The standard is truth.
9		9	MR. KISE: Truth. What's truth? The truth based
10		10	on the truth based on the Attorney General? The truth
10		11	based on the Court? The truth based on the person on the

KISE: If that was the question, it is an improper question because, the scope of cross is limited to what he talked about on direct. So, it's not to pull in something now that wasn't just like the witness said, to pull in something that's available now these statements were prepared 2011 through 2021. So, if this wasn't available, it is an improper THE COURT: But it was. MR. KISE: cross examination. He couldn't have relied on it. It is like asking him if he relied on the physics calculation on Mars. MR. SOLOMON: I'm asking if this witness relied on this in connection with his report not in connection with the Statements of Financial Condition. This witness didn't prepare the SOFCs as far as I am aware. MR.
